

Stanislav Sorokin

Senior Unity Developer | Mobile Games & Simulation Systems

☎ +48 573 882 665 | ✉ stansorokin14@gmail.com | 📍 Gdansk, Poland

Profile

Hands-on Unity/C# engineer and technical lead with 18+ years in game development, including extensive mobile game experience and production ownership from prototype through launch. Strong background in gameplay systems, architecture, profiling and performance optimization, physics/simulation mechanics, client-server systems and production debugging. Experienced working closely with designers, artists, QA and product stakeholders while maintaining high coding standards and practical, scalable technical solutions..

Core Skills

- Unity 3D & C#: gameplay systems, UI, architecture, debugging, production delivery and maintainable code.
- Mobile game development: iOS/Android production, casual/F2P, match-3, idle/tycoon and sports-management titles.
- Performance optimization: profiling, memory and runtime optimization, bottleneck identification and platform-specific debugging.
- Architecture & engineering practices: design patterns, data structures, modular systems, code quality and technical pipeline improvements.
- Physics & simulation: complex soccer match simulation, physics-based ball movement, AI decision systems and high-variability gameplay logic.
- Client-server & multiplayer: Mirror networking, AWS-backed persistence, APIs and online production systems.
- Unity production pipeline: Timeline, Animator, Cinemachine, Particle Systems/VFX, Shader Graph, ScriptableObjects and custom Editor tooling.
- Cross-functional delivery: long-term collaboration with game designers, artists, animators, QA, product managers and distributed teams.
- AI & automation: AI agents, LLM orchestration, local LLMs, Python and Node.js for code analysis, debugging, documentation and R&D.

Selected Mobile Games

- [Christmas Sweeper 4 - Match 3 \(Google Play\)](#) | [App Store](#) - casual F2P match-3 title.
- [Idle King - King Royal: Idle Tycoon \(Google Play\)](#) - mobile F2P idle/tycoon title.
- [Cricket Manager Pro 2023](#) - mobile sports-management title developed from MVP through production and launch.

Experience

Senior Console Porting Engineer / Technical Lead

Apr 2025 – Apr 2026

BBG Entertainment

Munich, Germany (remote)

- Modified and adapted established games for PlayStation 5, Xbox Series X/S and Nintendo Switch, working hands-on with existing production code and platform-specific requirements.
- Debugged complex issues and optimized engine performance and memory usage while preserving gameplay behavior across platforms.
- Built autonomous AI-agent workflows for technical documentation and debugging, reducing manual effort by ~40%, and used local LLMs for code analysis and refactoring.

Lead Game Developer

May 2024 – Mar 2025

DevNull Production

New York, USA (remote)

- Owned core gameplay mechanics
- Used rapid prototyping to shorten R&D cycles for new features, gameplay ideas and balancing.
- Worked closely with developers and artists, translating gameplay ideas into production-ready implementations under aggressive milestones.
- [The Longest Tale - Steam](#)

Lead Unity Engineer

Dec 2022 – Apr 2024

Virtual Programming

Bournemouth, UK (remote)

- Architected and developed a **complex soccer match engine** based on Node.js, featuring full simulation of game cycles.
- Implemented physics-based ball movement mathematics, advanced player AI decision-making systems, and high action variability.
- Utilized **Mirror networking** for real-time multiplayer features and integrated **AWS** for cloud-based game persistence.

CTO / Lead Unity Developer

Feb 2021 – Nov 2022

Wicket Gaming AB

Uppsala, Sweden (remote)

- Combined hands-on Unity development with product and technical ownership for mobile sports-management and idle/tycoon games.
- Led Cricket Manager and Idle King - King Royal from MVP evolution through production and market launch.
- Worked across gameplay, balancing, feature priorities, architecture and rapid product iteration with multidisciplinary teams.
- [King Royale: Idle Tycoon RPG](#)

CTO (Part-time/Advisory)

Oct 2019 – Jan 2021

Jack Power Casino

L.A., USA (remote)

- Engineered a comprehensive gambling ecosystem from the ground up, encompassing a unified game hub, kiosk solutions, and full-scale administrative back-office suites.
- Architected advanced **RTP (Return to Player)** algorithms and facilitated seamless title integration across international gaming platforms.
- Directed the end-to-end development of high-engagement titles, including **Ocean Dragon**, **River Dragon**, and **777 Casino**.

Lead Game Programmer / Product Manager

Mar 2020 – Dec 2020

D Hartt

N.Y., USA (remote)

- Organized and led the development process and core architecture for "The Guardians of Peace".
- Managed a multi-disciplinary team of 10, including developers, artists, and animators.
- [The Guardians of Peace - Steam](#)

Lead Game Programmer / Product Manager

Apr 2019 – Sep 2019

Charstudio

Lviv, Ukraine

- Led production for Christmas Sweeper 4, a casual F2P match-3 mobile game.
- Worked across gameplay implementation, feature delivery, balancing and coordination with art/content production.
- [Christmas Sweeper 4 - Google Play](#) | [App Store](#)

Lead Game Programmer / Product Manager

Jan 2018 – Mar 2021

Loom Network

Bangkok, Thailand (remote)

- Managed development as a Scrum Master, coordinating between Art, Backend, and Frontend teams (20+ members).
- **Achievement:** Raised over **\$500,000** in funds via Kickstarter and cryptocurrency platforms.
- <https://loom.games/en/>

AR/VR and Interactive Specialist

2018 – 2025

Collaboration with Briolight, Wegesrand, Wallenfels

- Developed a **Google Maps API-based AR navigation** app for Qatar tourism.
- Created **AR Eyewear Virtual Try-on** apps for Wallenfels, utilizing advanced face-tracking.
- Interactive museums, public interactive installations

Early Career Excellence

2007 – 2017

Acne (Stockholm), Signus, I-Free, Provectus etc.

- Held Lead/Senior roles and work on many projects

Education

Automation and Computer Science - Bachelor

Admiral Makarov National University of Shipbuilding

Mykolaiv, Ukraine

Languages

Ukrainian (Native)

English (Fluent)

Polish (Fluent)
